<mark>main</mark>

ID ----> 93258

ZENSAR

Product Operation

Main Method
do {
    1:Add
    2:Update
    3:Delete
    4:DisplayAll
    5: price using Id
    switch(){

    }
}while()

2nd Mini Project
Sprint 2

Product Object Stored permanently in external file.

Hint : (Collection Framework to store multiple objects)

In Sprint 2 we have to use exception handling try with resources

ID ----> 93258
